

March is Dental Month!

Hey, you know that we are big fans of dental care. But did you know that pets live up to 20% longer if they receive dental care throughout their lives? Dental care has probably saved more lives and alleviated more suffering than any other advance in veterinary medicine in the last several years. Because oral health deteriorates gradually, many of us do not recognize the effect is having on our pets until after dental care has been given. We are now making it easy for you to provide the dental care that your pet deserves. **In March, all dental cleanings are 50% off Monday through Friday.** Please call early for your appointment as this has been a very popular program and spaces are limited.

50% Off Annual Wellness Screens Extended

Our December Wellness promotion could only be described as a huge success! Over 50 pets benefitted from wellness blood and urine screens. Many clients were happy to learn that all systems appeared to be functioning normally. Our doctors were able to identify several pets with early or previously undetected disease conditions and apply appropriate measures to head off issues. Conditions discovered included urinary infections, anemia, early kidney and liver disease, thyroid and other problems. It is all about interceding early and improving quality of life. This seemed especially beneficial for our senior pets. Because of the success of this program and potential benefits to our pets, we have negotiated with our lab to keep prices low and allow us to extend the discounts into January and February. Please call for your appointment now, 707-433-6916.

- ♥ Program applies to healthy pets only.
- ♥ No doctor's exam required for testing.
- ♥ Callbacks on all test results.
- ♥ Exam & consultation scheduled for abnormal tests (fee not included).
- ♥ Results become a permanent part of the medical record.
- ♥ Tests may substitute for required annual monitoring profile or pre-anesthetic testing (time limitations may apply).

A Better Supplement?

Joint and other health supplements for people and pets are big business. It is estimated that billions of dollars annually are spent on these health products. A big problem is that they are not regulated strictly like medications. Studies have shown that the actual ingredients can and do vary greatly from their labels. In some brands the active ingredient was found to be low or even non-existent. In others, harmful ingredients were found. At Memorial Beach Veterinary Hospital we see a need for supplements that ensure both quality and quantity. We found that Nutramax Labs® fits that bill. They have an unparalleled reputation for research and quality control. Be assured that when you purchase joint and liver supplements like Dasuquin®, Cosequin®, and Denamarin® from our office you are getting what you pay for. Rebates are available at dasuquin.com and denamarin.com.

**Happy "tales" from your friends
